

### Crane / Beam / Davit / Derrick and 'A' Frame Testing

WATER WEIGHTS<sup>®</sup> water filled proof load bags are a unique, safe and simple product specifically designed to provide a test load instead of traditional solid weights.

- WATER WEIGHTS<sup>®</sup> water filled proof load bags are certified in accordance with Health and Safety Executive requirements.
- The bags have a physically proven factor of safety in excess of 6:1 and are proof load tested to over 2:1 prior to being taken into service.
- Gradual filling of the bag allows any problem to be identified prior to attaining maximum load.
- WATER WEIGHTS<sup>®</sup> water filled proof load bags weigh less than 2% of achievable load allowing for considerable savings in transport, storage and labour costs.

## Product Report

Specific examples of applications include:

- Ensuring the structural integrity of the biomes at the Eden Project during construction.
- Using WATER WEIGHTS® water filled proof load bags as a counterbalance on a split bridge in Holland.
- Testing the winches, hooks and a lifting beam for NASA to enable the safe replacement of a new signalling cone at the centre of a satellite.
- The largest ever test using WATER WEIGHTS® water filled proof load bags was a 660 tonne load applied to a barge crane at the Petrojet Oil Yard in Alexandria, Egypt.

**The WATER WEIGHTS® extensive range of equipment is available for hire and purchase**
