

Case Study

Certex Ltd
Harwich Port
UK

Project Specifics:

Following the successful load testing on Seajacks Ltd 'Kraken', Water Weights were requested to assist Certex in a load test on the sister jack-up 'Leviathan'.

The client required a 200t load to be applied in increments so they could take comparison readings on the cranes safe load indicator in order to verify accuracy.

This was achieved using 6 x 35t water bags configured in two sets of three hung from a Water Weights calibrated 250t load shackle. All rigging and loading was completed in one day to Seajacks Ltd satisfaction.

Client Feedback

Certex Ltd engineer Jody Potter said he was very impressed with Water Weights and the way the project went so smoothly.
